Professional Summary

Information Technology undergraduate with hands-on knowledge of Python, Java, SQL, and web application development. Experienced in building CRUD applications with Flask and PostgreSQL, front-end pages with React JS, and a Retrieval-Augmented Generation (RAG) application. Skilled in database management, data analysis, and ETL. Seeking a Python Developer role to apply and grow my software development skills.

Technical Skills

- **Programming Languages:** Python, Java, SQL
- **Frameworks and Libraries:** Flask, React JS
- **Databases:** PostgreSQL, SQL, Relational Database Design
- **Data:** Data Analysis, ETL
- **Web Development:** Web Application Development, REST APIs, HTML, CSS, JavaScript
- **Tools:** Git, GitHub

Projects

CRUD Application (Flask and PostgreSQL)

- Built a web application supporting create, read, update, and delete operations using Python Flask.
- Designed and managed a PostgreSQL database for data storage and retrieval.

Hospital Landing Page (React JS)

- Developed a responsive hospital landing page using React JS.
- Structured reusable components for a clean and maintainable user interface.

RAG Application (Python)

- Developed a Retrieval-Augmented Generation application that answers questions using custom document data.

Education

B.Sc. in Information Technology (Undergraduate)

Open University of Sri Lanka

GCE Advanced Level, Mathematics Stream (2021)

Al-Azhar National School

Certifications

- IBM Data Analysis with Python
- Data Analysis, Novitech R&D
- SQL and Relational Database
- Java Fundamentals, Unique Technologies

Languages

English, Tamil, Sinhala

Interests

Reading Books, Cricket, Cycling
